EXPERIENCE

Salesforce, TX — Senior Software Engineer

January 2024 - Present

IGA Platform Team

- Spearheaded the containerization of SailPoint IdentityIQ (IIQ) and led its deployment on Amazon Elastic Kubernetes Service (EKS), ensuring scalable, high-performance, and highly available infrastructure.
- Collaborated on the implementation of cloud-native best practices, optimizing both infrastructure and operations while significantly reducing overhead.
- Developed custom APIs to extend the functionality of SailPoint IdentityIQ by integrating external systems for seamless automation of user provisioning and de-provisioning.
- Leveraged IIQ plugins to enhance system interactions and improve workflows for identity management, streamlining processes and enhancing security.

JP Morgan Chase & Co, TX — Lead Software Engineer

May 2019 - December 2023

Identity Access Management - JML Team

- Designed and developed an innovative solution to automate the Joiner, Mover and Leaver processes within the firm.
- Implemented a centralized platform that effectively manages ~3M identities and their access to critical data and applications throughout the entire Identity Lifecycle.
- Successfully developed and deployed reporting tools for the product team, enabling efficient and automated retrieval of various user-related metrics.

Identity Access Management - Application Onboarding Team

- Played a key role in the successful onboarding of multiple applications across JPMC onto Sailpoint's Identity Access Management Tool (IdentityIQ) by leveraging REST API's.
- Designed, developed and seamlessly integrated a range of RESTful services to automate different aspects of the application onboarding process, resulting in a remarkable reduction of over 90% in overall effort and a threefold increase in team productivity.

SKILLS

Languages:

Java, C++, Python, HTML5, CSS, JavaScript, jQuery, R.

Cloud Tools and Technologies:

AWS (EC2, VPC, S3, CloudWatch, RDS, Elastic Beanstalk)

Platforms:

Windows, UNIX/Linux, Android.

Protocols:

TCP/IP, UDP, HTTP.

Frameworks:

Java Spring boot, Java Swing, JavaFX, Bootstrap, AngularJS, Flask, Apache Jena, Protege, Apache Hadoop, REST, GraphQL.

Databases:

MySQL, Oracle, InfluxDB.

Tools:

Sailpoint IdentityIQ, Eclipse, IntelliJ, Visual Studio, Jira, Git, ClearCase, R Studio, Android Studio.

Education

Master in Science - Computer Science,
The University of Texas at Dallas,
Richardson, Texas.

Bachelor of Engineering - Computer Engineering,
Mumbai University, Mumbai, India.

Cadence Design Systems, MA — Software Engineer II

November 2016 - May 2019

Indago Debug Analyser Team

- Collaborated with industry experts to conduct comprehensive research, design, development, integration, testing, and performance optimization of software applications and features focused on debugging and validating highly complex hardware designs, specifically System on Chip (SoC) designs.
- Took charge of full stack development responsibilities, including graphical user interface (GUI) design for customers, application level business logic implementation and back-end database management.
- Utilized Clear Case for revision control and software configuration management, while leveraging Maven to streamline dependency management and build processes within a Linux/UNIX platform.
- Demonstrated proficiency in creating new API's and designing automated functional regression tests using Squish, contributed to improved efficiency and reliability in software development.

University of Maryland-Baltimore, MD — Bioinformatics Software Engineer I

February 2016 - November 2016

- Designed, implemented and hosted interactive surveys to engage participants in health awareness programs, enabling valuable data collection and user feedback.
- Conducted data analysis for research studies at the University of Maryland, Baltimore - School of Medicine, providing critical insights for scientific advancements.
- Refactored legacy code of the organization's website, resulting in a substantial 85% performance improvement and the successful addition of new features.

Academic Projects

- IAAS Cloud Middleware
Technologies: Python, Java Swing, Hadoop Map Reduce
- TripAdvisor
Technologies: Java Swing, Java, Protege, Apache Jena.
- Contact Manager
Technologies: Java Swing, Android.
- Airline Management System
Technologies: Java and MySQL.
